NextStop

PRESS FACT SHEET
October 2026

When ‘wyd’ becomes a real night out.

NextStop is the AI hangout app for groups who’ve already done everything in their town. Say the mood, get a place worth going to right now, and get the whole group there.

WHAT IT DOES

The Pick
Say the mood, get a place worth going to right now. The fix for “we’ve done everything in our town.”

Scout
A guide who only says what he can prove: today’s hours, your own visits, the real drive. When there’s nothing worth saying, he says nothing.

The Rally
Live group coordination: real-time ETAs, arrival alerts and drive-safe pings. Pro puts the whole crew on the lock screen.

The Recap
Every Rally becomes a recap video and one shared album the whole group adds to. Pro keeps the videos forever.

Smarter places PRO
Place intelligence: what to order, when to go, live busyness and what the web is saying.

Shared pages
Every group chat gets a shared page: the place, the time and who’s bringing what, right where the conversation happens.

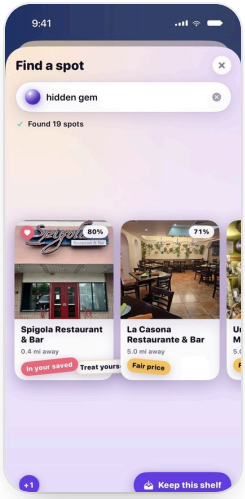

QUICK FACTS

Product	NextStop
Platform	iPhone (iOS 18+)
Launch	Private beta now
Pricing	Free · Pro $6.99/mo or $49.99/yr
HQ	New Brunswick, NJ, USA

Ink	Orange	Ivory	Deep	Backdrop
#19171A	#D85A26	#F6F1E7	#B0461C	#07080A

PRIVACY

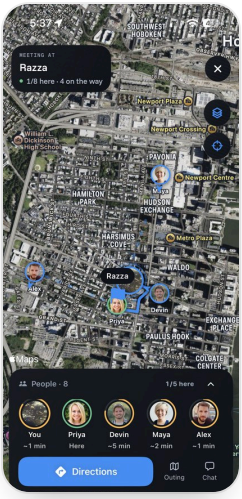

Live location is shared only with the friends you choose, never publicly and never with advertisers. Day History stays on the iPhone unless the user turns on backup. NextStop doesn’t sell data or run an ad network.

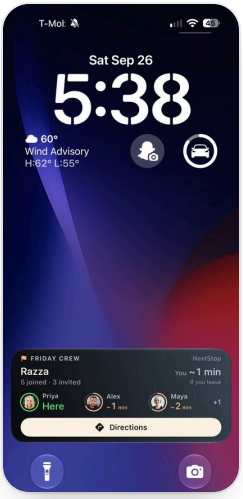

The Pick. “Hidden gem” finds 19 spots.

Scout. Two places, head to head.

The Rally. Everyone’s ETA on one map.

Lock screen. The crew, live. Pro.

Your places. Saved, in shared folders.

FOUNDER

Mark Kamel is NextStop’s founder and sole developer. He built it end to end: the iOS app in SwiftUI, the Python backend, Supabase realtime and the AI planning. Based in New Brunswick, NJ, and available for interviews.

Logos and screenshots are free to use in coverage of NextStop.
All screens are real app screens; some show demo data.
